Darkstone Free on Android & IOS

Been a long time since the last time I posted; but this has caught my attention:

<https://play.google.com/store/apps/details?id=com.microids.google.darkstone>

<https://itunes.apple.com/nz/app/darkstone/id720151475>

As you can see Darkstone has been released on Android and IOS with re-created menus.

So one thing to say - Enjoy 🍷
